## 1 Nature of operations

Colabor Group Inc. (hereinafter the “Company”) distributes and markets food and food-related products in Canada.

The Company is incorporated under the *Canada Business Corporations Act*. It is a Canadian company headquartered at 1620 De Montarville Boulevard, Boucherville, Quebec, J4B 8P4. The Company’s shares are listed on the Toronto Stock Exchange under the symbol GCL.

### **Covid-19**

During the first quarter of 2022, the Covid-19 pandemic ("pandemic") continued to affect the markets in which the Company and its suppliers operate and to impact customer demand, resulting in lower sales. The restaurant dining rooms were closed from December 31, 2021 to January 31, 2022 due to restrictions imposed by the Government of Quebec. It is prudent to predict that the disruptions could still persist in the coming quarters in the restaurant industry given the uncertainties surrounding new variants of the virus, new government measures, and the gradual return of workers in their workplaces and tourism, as well as the longer-term impact on the economy and health regulations that will apply.

The duration and impact of the pandemic are unknown at this time, and it is impossible for management to reliably estimate the extent and impact of these developments, as well as the impact on the Company's financial results and financial position for the coming year. Depending on the occurrence of new waves, their scale and changes in the industry, the impacts could be significant.

## 2 Significant accounting policies

### **General information**

These interim condensed consolidated financial statements of the Company were prepared in accordance with International Accounting Standard ("IAS") 34, Interim Financial Reporting. Some information and notes disclosure in the consolidated annual financial statements have not been presented or are summarized when they are not considered essential to understanding the Company's interim financial statements. Therefore, these interim condensed consolidated financial statements should be read in conjunction with the audited consolidated financial statements for the year ended December 25, 2021.

These interim condensed consolidated financial statements have been prepared in accordance with the same accounting policies that have been adopted by the Company in its consolidated financial statements for the year ended December 25, 2021. The accounting policies have been applied consistently for all the periods presented.

The interim condensed consolidated financial statements have been prepared on a going concern and historical cost basis, except for certain financial instruments and pension plan's assets that are measured at fair value, and for defined pension obligations and provisions that have been recorded at present value. Financial information is presented in Canadian dollars, which is the Company's functional currency.

The net loss for these interim financial statements are not necessarily indicative of the full-year net earnings. The seasonal nature is a significant factor in its quarterly results. Lower earnings are recorded during the first quarter. The second and third quarters are generally recording higher earnings than those recorded during the first quarter (see note 1 for the

pandemic situation). Finally, since there are 16 weeks of operations in the last quarter compared to 12 weeks in the previous quarters, the fourth quarter is the most important one.

These interim condensed consolidated financial statements have been approved by the Company's Board of Directors on April 27, 2022. The Company's auditors have not performed a review of these unaudited interim condensed consolidated financial statements.

### 3 Operating segments

The Company has two reportable segments: Distribution and Wholesale. These operating segments are monitored and strategic decisions are made on the basis of segment operating earnings. Management does not take assets and liabilities into account when analyzing individual segments.

The Distribution segment's operations include the distribution of food products and related products in hotels, restaurants and institutions ("HRI") and retail market. In that segment, the Company distributes specialized products such as meat, fish and sea food ("Specialty Distribution") as well as general food-related products ("Broadline Distribution"). These different types of products are grouped under the same segment because of their similar nature, type of clients and distribution methods.

The Wholesale segment's operations include the sale of general food-related products to distributors from its distribution center in Boucherville.

The Company and its chief operating decision maker are assessing the performance of each segment based on adjusted EBITDA, which corresponds to sales minus cost of goods sold and operating expenses from current operations. The other expenses are recorded on a consolidated basis, therefore they are not considered in the adjusted EBITDA. Inter-segment eliminations and others eliminate all inter-segment transactions included in the operating earnings for each segment and include headquarters' operations. Transactions between segments are recorded at a value agreed upon by both parties.

## 10 Financial Instruments

### A) Fair value

Fair value of cash and cash equivalent, trade and other receivables as well as trade and other payables is equivalent to the carrying amount due to their short-term maturity. Therefore, the time value of money is non-significant.

The carrying amount and fair value of the other financial instruments in the consolidated statements of financial position are as follows:

	As at March 19, 2022		As at December 25, 2021	
	Carrying amount \$	Fair value \$	Carrying amount \$	Fair value \$
<b>Financial asset</b>				
Non-current				
Derivative financial instrument	340	340	145	145
<b>Financial liabilities</b>				
Non-current				
Credit facility	27,454	27,750	35,185	35,500
Subordinated debt	14,810	15,000	14,804	15,000
	<b>42,264</b>	<b>42,750</b>	<b>49,989</b>	<b>50,500</b>

The fair value of the credit facility is comparable to the carrying amount as the interest rate fluctuates with the market rate with conditions comparable to those prevailing in the market.

The fair value of subordinated debt was determined by discounting future cash flows at 7.25% (7.25% as at December 25, 2021), the current rate of subordinated debt.

The fair value of the interest rate swap entered in April 2021 is calculated at the present value of the estimated future cash flows using an appropriate interest rate yield curve. Assumptions are based on market conditions prevailing at each reporting date. The fair value of derivative instrument reflects the estimated amounts that the Company would receive or pay to settle the contract at the reporting date. As at March 19, 2022, the fair value of the interest rate swap is an asset of \$340 and is accounted for under Other in the non-current assets of the consolidated statement of financial position.

### **Fair value measurement**

The valuation techniques as well as the significant observable market data used in the measurement of Level 2 fair values are the same as those described in the consolidated financial statements for the year ended December 25, 2021.

There was no transfer between the levels during the 12-week period ended March 19, 2022.

### **B) Financial risks management**

The Company is exposed to various financial risks resulting from its operating, investing and financing activities. The Company's management manages financial risks in the purpose of limiting the Company's main financial risk exposure. The Company does not enter into financial instrument agreements, including derivative financial instruments, for speculative purposes.

There were no significant changes in the Company's risk exposure during the 12-week period ended March 19, 2022 compared to the description given in the consolidated financial statements for the year closed on December 25, 2021.

## **11 Contingency**

Since the second quarter of 2019, a lawsuit from a client for an amount of \$5,250 (US\$4,200) has been initiated against the Company, alleging a default to the terms of the agreement. The Company intends to defend itself vigorously.

## **12 Subsequent events**

On April 4, 2022, the Company acquired all of the shares of Le Groupe Resto-Achats Inc. and its subsidiaries ("GRA") for an amount of \$4,500, of which \$2,000 was payable at the closing date, \$1,000 is payable April 4, 2023 and \$1,500 in contingent consideration based on the achievement of certain income thresholds. The contingent consideration is payable in two equal installments of \$750 in May 2024 and May 2025. Working capital adjustments will also be payable in the next fiscal year.

Founded in 2008 and headquartered in Quebec City, GRA is a major purchasing group for independent restaurants and seniors' residences located primarily in eastern Quebec. With more than 200 active members and nearly \$4,000 in supplier revenues for the year ended December 31, 2021, GRA provides access to group business terms for food supply and other services related to restaurants.

On April 11, 2022, the Company announced the completion of the acquisition of certain assets from Ben Deshaies Inc. ("Ben Deshaies") at the effective date of April 22, 2022 for an amount of \$442. The acquisition includes, in particular, Ben Deshaies' assets related to foodservice activities in the Outaouais and Laurentians regions, as well as certain related equipments. These activities represent approximately \$13,000 in annual revenues and will be served from a facility located in Mont-Laurier.

Given the very limited time between the closing date of these acquisitions and the publication of these interim condensed consolidated financial statements, some information to be disclosed in respect of business combinations under IFRS 3, particularly the preliminary purchase price allocation, was not provided as the information was not available. The Company is in the process of conducting a fair value analysis of the assets acquired and the liabilities assumed.
